# Get the advantage of cost-effective and easy-to-use business data security and backup solutions.

## PC Security

Protect your business from common threats such as viruses, worms, Trojans and other attacks with Tata Communications' PC Security. An SMB focused solution to secure your business processes with antivirus, antispymware, antirootkit, personal firewall, antispam and antiphishing features under a single-user interface.

### Key benefits

- Automatic security updates for all types of threats to ensure that your protection is always up-to-date
- Easy and effective management tools for anytime, anywhere access without any additional infrastructure investments
- Minimal bandwidth consumption with smart updates
- Support for multiple PCs
- DeepGuard/NHIPS technology with the advantage of 'in-the-cloud' computing, enabling global protection for all end-user computers within 60 seconds from the initial confirmation of a new threat
- Flexibility to buy as per your need, based on the number of users in your organization

## Web Filtering

Have the benefits of a Web Filtering service that lets you monitor, manage, control and implement secure Web browsing in your organization. Now, you can reduce legal liability as well as increase the productivity of your workforce by blocking inappropriate and unauthorized Internet content.

### Key benefits

- Excellent website coverage with a constantly evolving and dynamically updated URL list
- Lower total cost of ownership with scalability without spending on on-site equipment
- Simple management interface with detailed reporting
- Full end-user identification and reporting
- Control access to websites and Chat. Create your own blacklist/whitelist

## Online Backup

Discover a solution that provides you with unlimited, automatic, secure and easy-to-use online backup to cater to the growing data needs of your organization. The built-in security ensures that all your files are always protected, while in transit and when stored on the servers.

### Key benefits

- Unlimited storage capacity
- Secure Encryption with 3DES encryption and 128-bit Secure Socket Layer (SSL) encryption
- Option for selective backup
- Incremental backup for documents, which are new or changed, thus saving time
- Reporting with e-mail alerts
- Management of backed-up files through a Web interface anywhere, anytime, without additional investments
- Automatic update of the tool. If a newer version is available it is automatically downloaded
- Restore data to a suitable PC on hardware failures, thus preventing loss of critical data

## Save big on smart product bundles

**Protector Web ₹999\* per annum:** Web Filtering + PC Security

**Protector Backup ₹1455\* per annum:** Online Backup + PC Security
