

# Server Security

A Server Security solution for growing businesses

Virus attacks in a corporate network can lead to network disruptions, corrupted data and leak of confidential data, causing productive business hours to be affected. Tata Communications' Server Security solution powered by F-Secure, besides providing continuous virus protection, also ensures that infected machines do not spread viruses across the network. It comes with effective tools to help manage your server's security, even while you are on the move.

## Key Benefits

- **Comprehensive Protection against Malware** - Stops all types of malware including Windows viruses and macro viruses (that infect Microsoft Office files), as well as spyware and riskware. The backlight technology provides detection and removal of hidden malware and hidden suspicious items.
- **Automatic updates and upgrades** - Updating virus definitions is automatic and secure. Upgrades and updates are part of the subscription.
- **Easy-to-use Management Tool** - Access the Web-based management portal anywhere, anytime. Automatic notification to administrators in case of any security incidents or virus activity.

## Features

- Real-time protection against viruses, spyware and riskware
- Real-time scanning - Users connecting to the file servers using infected machines cannot save any content on the servers.
- Multi-engine protection has been upgraded to offer significantly faster malware scanning and smaller memory usage while keeping the detection rate on the highest possible level
- Manual scanning for viruses, spyware, riskware and rootkits
- Scheduled scanning
- Automatic signature updates (Internet connection required)
- Central Management from a single console

## System Requirements

### The recommended system requirements for Windows Servers 9.00

- Processor: Intel Pentium 4, 2GHz or higher
- Memory: 1GB or more
- Operating System: Microsoft Windows Server 2003, Windows Server 2008, Windows Server 2008 R2, Small Business Server 2003, Small Business Server 2008
- Disk space: 1GB free or more
- Display: 16-bit or more (65,000 colors)
- Internet Connection: An Internet connection is required to validate your subscription and to receive updates
- Web browser: Internet Explorer 6.0 or newer
